

2019 PARTNER OF THE YEAR

Network Communications Innovation

A W A R D

**Recognizing the innovative development, building,
and integration of network communications solutions.**

WINNER

As we move to an ever growing consumption of data in the world, how we accelerate the adoption of the move to 5G and the Edge is paramount. Smart Edge worked with Intel to develop the most comprehensive edge / MEC solution in the industry.

Through the unique harnessing of Intel capabilities across all levels (compute , network, storage and memory), along with advanced software from Intel (NFF-go, QAT, DPDK), the new horizon of the far edge is defined and accelerating at market speed and adoption.
